Subject: Master BERA summary table from EPA
Attachments: New Summary Table 11-1.xlsx

Jennifer,

Attached is the latest summary table of all identified risks in the BERA from hazard quotients. Does not include any toxicity test results, which are reasonably well summarized in the BERA itself. The verbal consensus I've received from the team is that this should be split up into 13 separate tables, one for each BERA assessment endpoint. But for now its still in the unified format.

The attached has some gaps where we couldn't find information, making us think LWG did not evaluate some of the required lines of evidence from the problem formulation.

Best regards,

Burt Shephard
